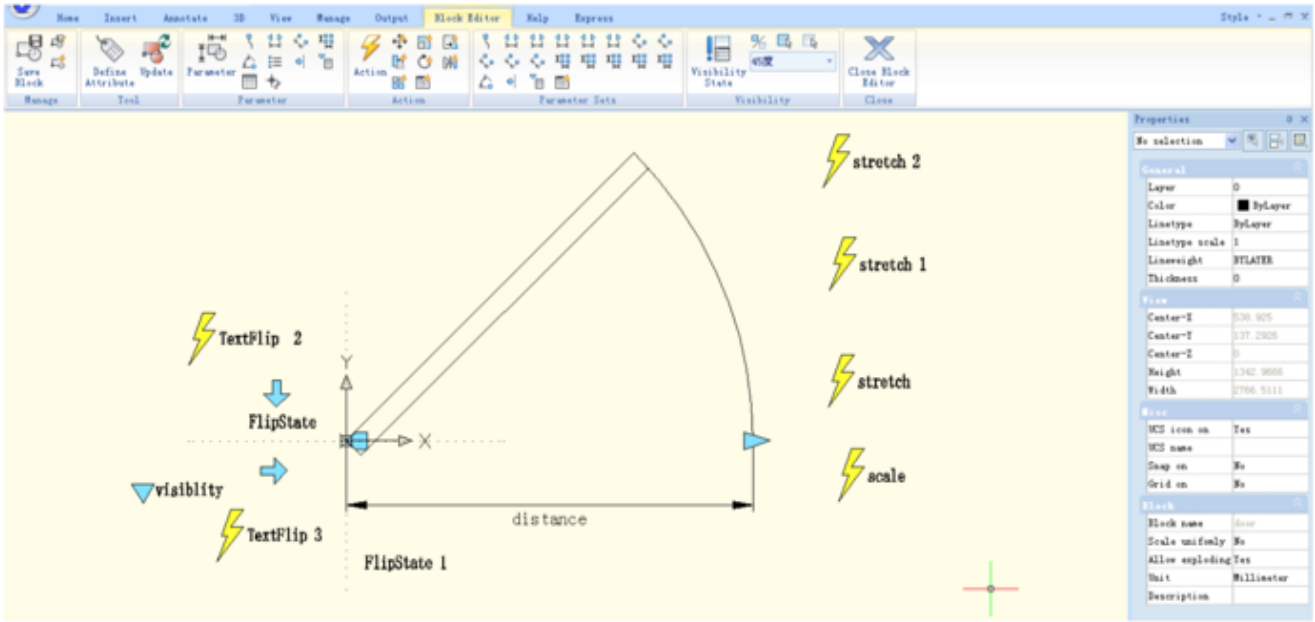
Dynamic Block Editor User Interface

1083 kbadmin April 3, 2016 Tips & Tricks 0 5195

You use the Block Editor to define and modify the objects and behavior in a block definition. In the Block Editor, you add parameters and actions, which define custom properties and dynamic behavior.

You can access the Block Editor by typing BEDIT command or double-click the block without attribute. You will see The Block Editor ribbon interface as below, the black arrows mark stand for parameters, while yellow lighting symbol for action. If users are working under classic interface, it will pop-up toolbars.



Dynamic Block Editor Tool Panels:

Manage : Save or Save as the default block; Create or edit another block. Tool: Define, edit or update the block attribute.

Parameter : You can add parameters for Dynamic Blocks on this panel.

Parameter Sets : You can add the parameter set on this panel. Visibility: This panel is specially used for Visibility editing.

Visibility : This panel is specially used for Visibility editing.

Close : It is used to exit the Block Editor. Before exiting, some commands like save or open etc. might not
work.
