

Offline Upgrade GstarCAD on other computer

1265 kbadmin June 30, 2021 [Update and Upgrade](#) 0 2999

If you would like to upgrade to the latest GstarCAD on another computer that is not the same as the one you installed GstarCAD old version,

first, you need to return the authorization of the GstarCAD old version from the GstarCAD License Manager which can access from the **Start button - All programs - Gstarsoft** and select the **GstarCAD version**.

After the authorization of GstarCAD software returned, contact your local distributor and provide the license serial number and the upgrade version, after you get the reply.
