WMFFOREGND system variable

Function Description:

The **WMFFOREGND** system variable is used to specify the foreground color when inserting an object as WMF format.

Type : Integer
Saved in : Not saved
Initial value : off

Users could use one of the following way to insert objects: Export **WMF** file by **WMFOUT** command
Copy to clipboard and paste as **WMF** files
Drag as **WMF** files
The **WMFFOREGND** will be applied when **WMFBKGND** system variable is turned off.

System Variable Value:

Off : if necessary, exchange foreground color and background color to make sure that the foreground is darker than background color
On : if necessary, exchange foreground color and background color to make sure that the foreground is brighter than background color
