BATPURGE command

1990 GstarCAD MY /KW August 3, 2021 CAD Commands 0 1127

The BATPURGE command is new function allows to batch purge the excess objects such as blocks, layers, line type, dimension style or text style on several DWG files. The Batpurge tool doesn't need to open files. It executes the command of purge directly, which makes it run with very high efficiency. You can access it from:

Command Access :

Command Entry : Batpurge

Menu : Express>Drawing Tools>Batch Purge

After the command is started, a dialog box will be displayed as shown in the picture below:

In this dialog box you can add, select, unselect, clean and start purging objects within DWG files with the following options:

Add Files : You can add one or more batch files from the selected path.

Files List	Dwg Open		DWG FOR THE SALES STAF	• + Search	DWG FOR THE SALES		Add Files
