

# COPYLINK command

2057 GstarCAD MY /KW August 10, 2021 [CAD Commands](#) 0 1195

The **COPYLINK** command is used to copy current view to clipboard and make it easy to link to other OLE application program.

## **Command Access:**

**Menu** : Edit > Copy Link

**Command** : COPYLINK

## **Function Description:**

Users could copy the current view to clipboard and paste objects in clipboard to another file as a linked OLE object.
