

QDIM command

2300 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 2250

The **QDIM** command is used to create a series of dimensions for selected objects quickly.

Command Access:

Ribbon : Annotation > Dimension > QDIM

Menu : Dimension > Quick Dimension

Command : QDIM

Command Prompts:

Associative dimension priority = End

Select geometry to dimension:

Specify dimension line position, or

[Continuous/Staggered/Baseline/Ordinate/Radius/Diameter/datumPoint/Edit/seTtings]:

Function Description:

This is a very useful command to create a series of baselines or linear dimension or a series of circles or arc dimensions.

Relative Glossary:

Continuous:

Create a series of continuous dimensions.

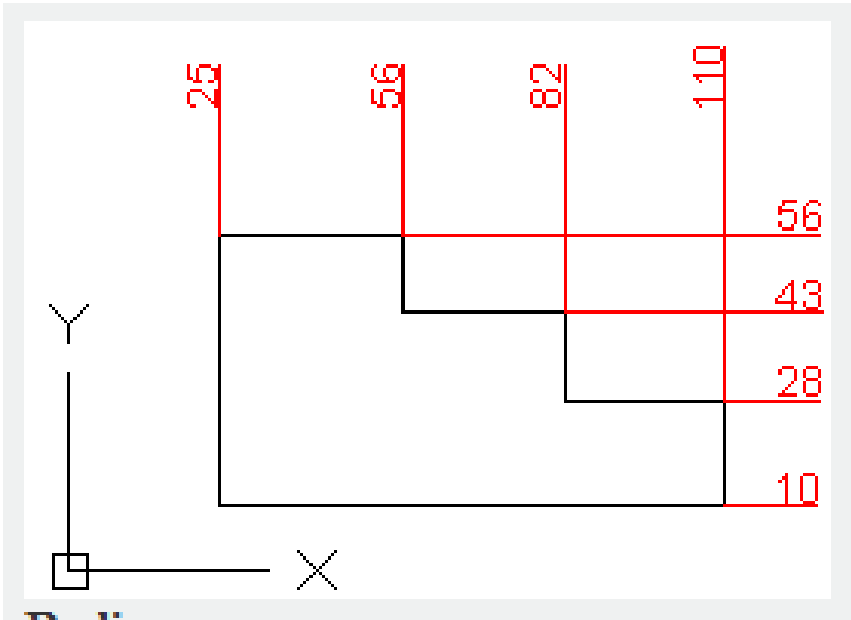

Staggered : Create a series of staggered dimensions

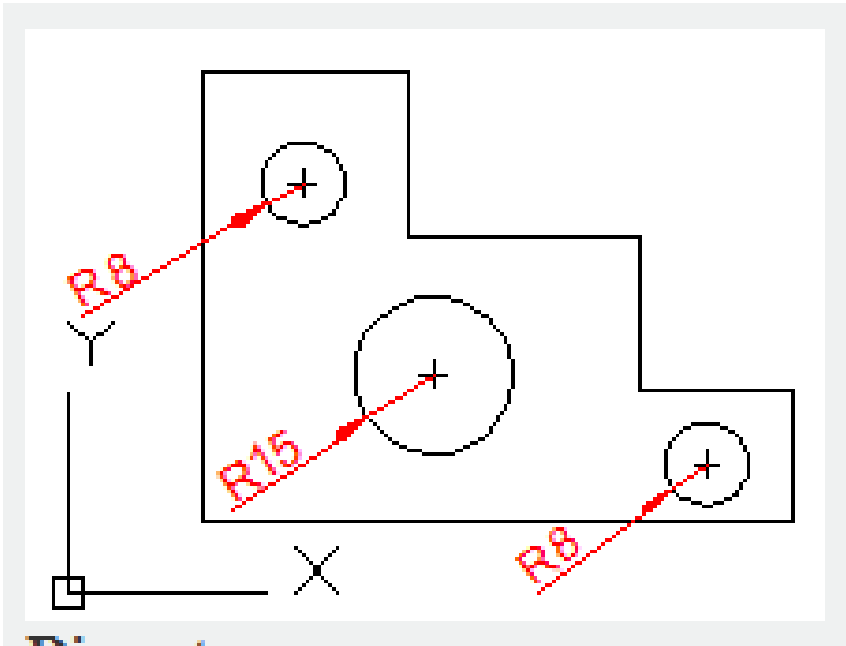

Baseline : Create a series of baseline dimensions.

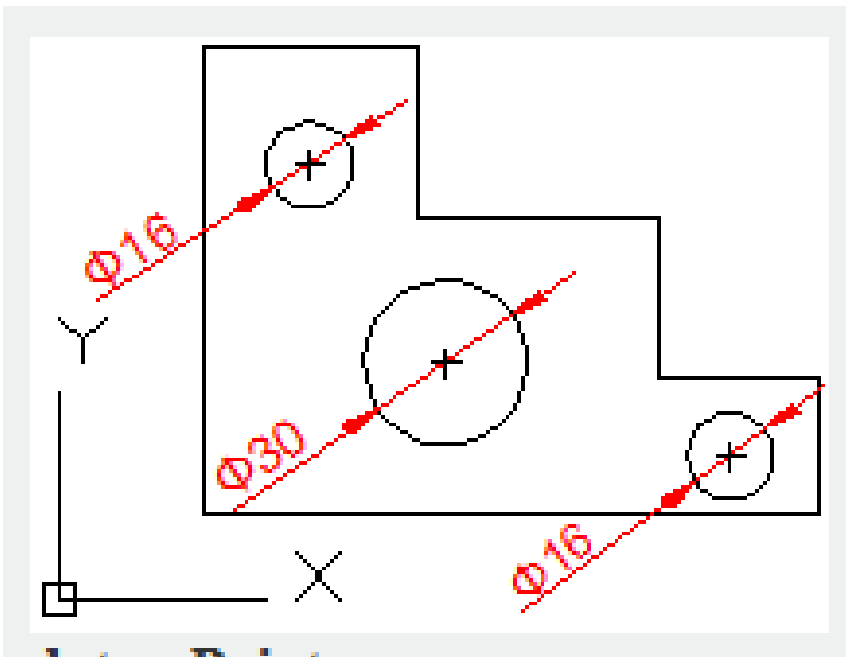

Ordinate : Create a series of ordinate dimensions.

Radius : Create a series of radius dimensions.

Diameter : Create a series of diameter dimensions.

Datum Point : Specify new datum point for base dimensions and ordinate dimensions.

Edit : Edit a series of dimensions and prompt to add or remove points in existing dimensions.
settings : Set up default objects snap for specified dimension lines origin.
