

VBARUN command

2454 GstarCAD MY /KW August 26, 2021 [CAD Commands](#) 0 1822

The **VBARUN** command is used to run a VBA Macro.

Command Access:

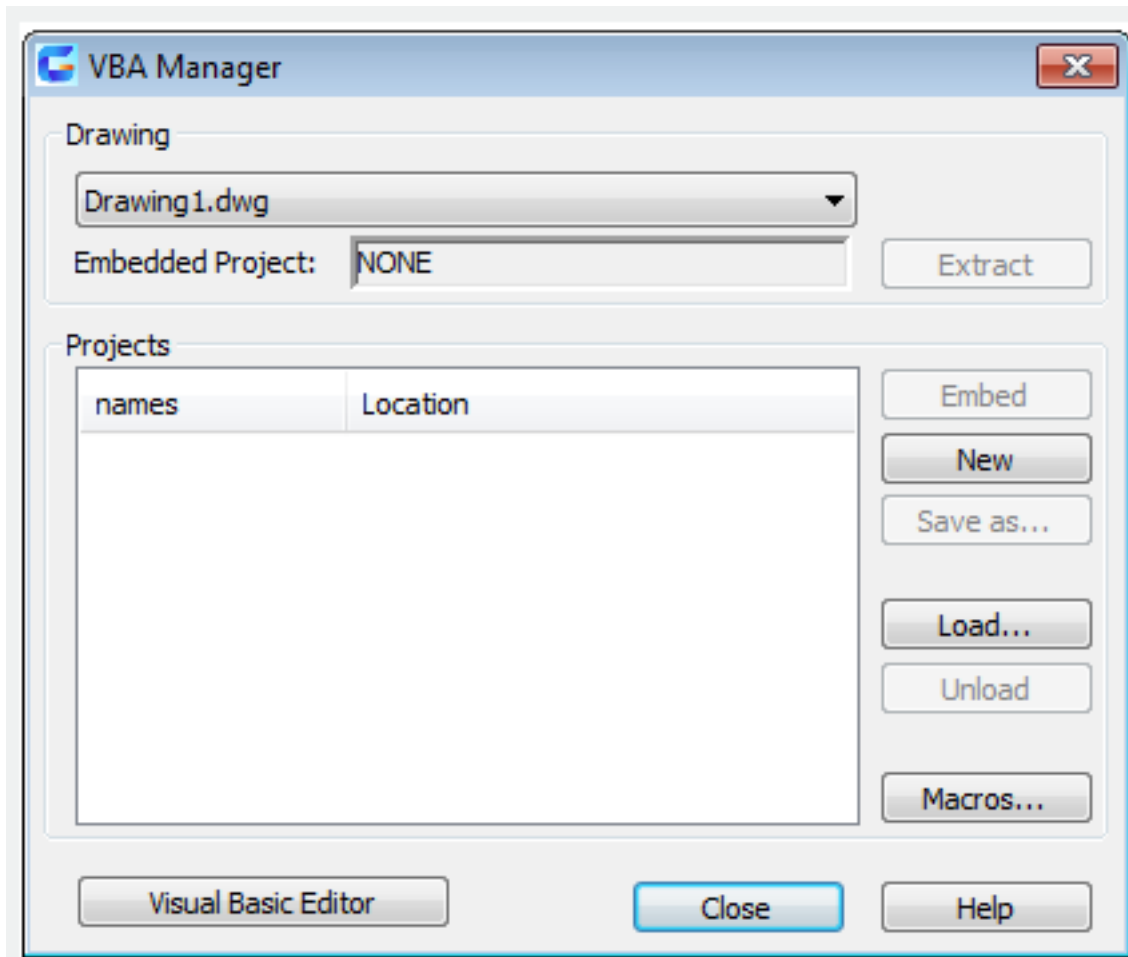

Ribbon : Manage > Applications >Runs a VBA macro

Menu : Tools> Macro > Macros

Command: VBARUN

Function Description:

Users could use this command to run, edit or delete VBA Macros, as well create a new Macro, set VBA options and display "VBA manager" dialog box.

Relative Glossary:

Macro name

Specify the name of a macro that to be run, edited, deleted or created.

Macro list

List all selected drawings in "Macros in" or all macros in the project.

Macros in

Specify all projects or drawings in the macro list. If there is no project or drawing in the list, users could click "VBA Manager..." to load the project or drawing.

Description

Describe the selected macro.

Run

Run the selected macro.

Step into

Display the "Visual Basic Editor" and begin to run a macro. The running operation will stop at the first row of executable code.

Edit

Display the "Visual Basic Editor" and selected macro.

Create

Create a macro by specified name in the "Macro Name" and display the "Visual Basic Editor" dialog box, as well the empty application frame of the new macro.

If there is no specified project or drawing, it displays "select project" dialog box.

If selecting "Yes", all existing code will be deleted and it will create a new empty macro by specified name.

Delete

Delete selected macro.

VBA Manager

Display the VBA Manager Dialog box.

Options

Display the VBA Option dialog box.
