

Draw Rectangles and Polygons

2501 GstarCAD MY /KW April 14, 2022 [Workflow](#) 0 2676

Use [RECTANG](#) to create rectangular shape polylines. You can specify the length, width, area, dimensions and rotations.

Use [POLYGON](#) to create closed polylines with 3-1,024 equal-length sides, you can create equilateral triangles, squares, pentagons hexagons, and so on.

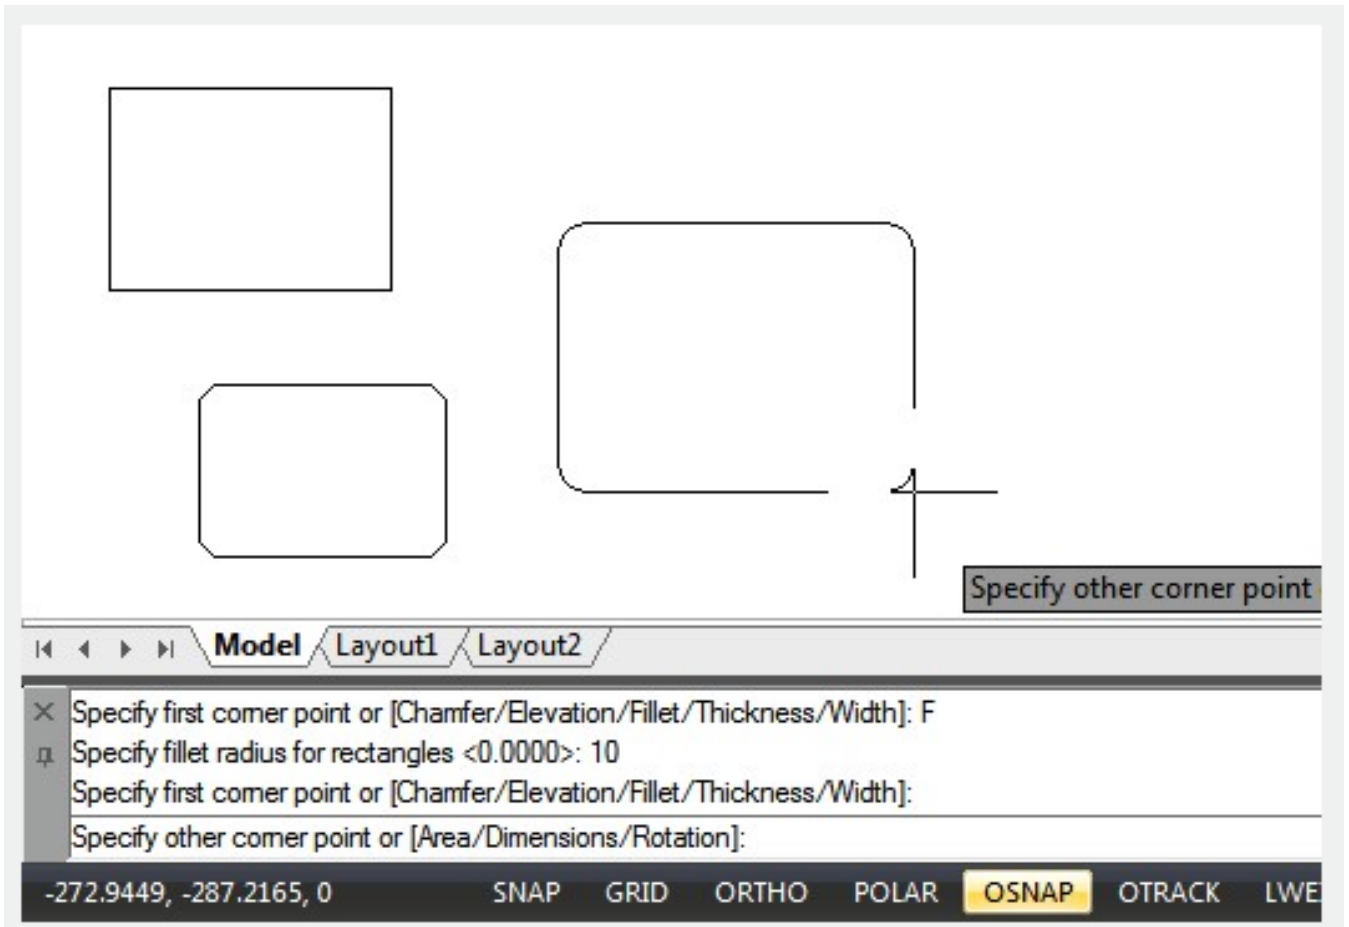

To draw a rectangle

1. Do one of the following:

- Select Draw > Rectangle on the main menu.
- Click the Rectangle tool on the Draw 2D toolbar.
- Type `rectang` or `rec` and press Enter.

2. Identify one corner of the rectangle or enter an option. Specify first corner point or [Chamfer/Elevation/Fillet/Thickness/Width]:

3. Identify the opposite corner of the rectangle or enter an option. Specify other corner point or [Area/Dimensions/Rotation]:

Drawing a polygon

You can draw a polygon by specifying the edge, Inscribing in circle or Circumscribing about circle.
