

# Create Multiline Text

2558 GstarCAD MY /KW April 15, 2022 [Workflow](#) 0 1377

A multiline text ([MTEXT](#)) object includes one or more paragraphs of text that is manipulated as a single object.

You can create mtext in the In-Place Text Editor or an alternative text editor, you can also insert text from a file. The In-Place Text Editor displays the bounding box with a ruler at the top and the Text Formatting toolbar.
