

Get Selection by Object Type

2667 GstarCAD MY /KW November 18, 2021 [Workflow](#) 0 779

You can use this function to multi-select objects with the same entity type in specified area.

Menu : Express>Selection Tools>Get Selection by Object Type

Command Entry : GETENTSEL

Operation steps:

- 1.Start the command.
- 2.Select object and system will take the specified entity type as target type.
- 3.Specify region.
- 4.System will bring all the blocks with same entity type in region selected area into the selection.
